

Pressure Washing

Baker Commodities Inc.

Recycling for Life®

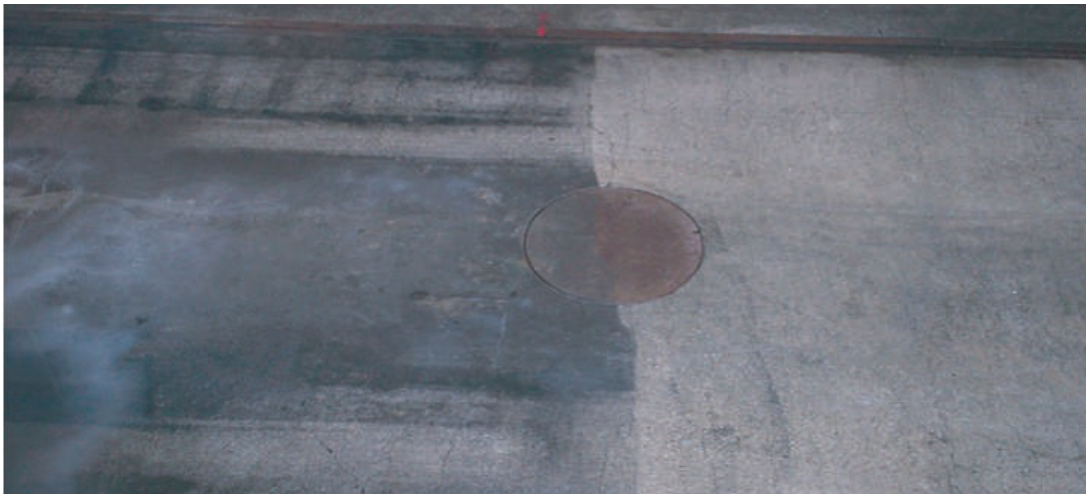

Baker Commodities provides comprehensive on-site pressure washing and degreasing with full waste water recovery services for corrals, sidewalks, parking lots, drive-thrus, decks and trash areas.

Our power-washing services will remove grease, grime, gum and heavy dirt. They can also be used to clean up major grease spills. We utilize the latest state-of-the-art pressure cleaning equipment and techniques to meet, and exceed, your high standards of cleanliness and building appearance.

Our trucks are equipped with customized built-in power washers that feature high-volume pumps and full waste water recovery equipment engineered specifically for high-pressure cleaning of concrete walkways, pads and driveways. As the work is performed, the used water and dirt is collected with a vacuum hose and a Vacu-Boom. After the job is finished, the waste water and dirt are taken back to our environmentally-friendly processing plant to be properly cleaned and recycled.

Before & after pressure washing

Our Total Grease Management™ (TGM) Program is also available to meet your grease removal, plumbing and cleaning needs. We can customize the perfect program for you, including:

- Used Cooking Oil Collection
- Grease Trap & Interceptor Pumping
- Drain Cleaning & Plumbing
- Preventative Maintenance
