## DRAIN FILTER SYSTEMS

A common problem in all types of commercial kitchens is foreign debris washing down the drain and clogging sewer systems, resulting in costly plumbing bills. Baker Commodities has developed a set of solutions designed to prevent food from discharging into the drain system and causing bigger problems.

### FEATURES

Drain Socks fit snugly into drains to catch food debris and prevent it from clogging the drain system. Made of synthetic mesh material, the drain socks fit drain sizes 1.5", 2", 3" and 4". Each drain sock is 8" long.

Drain Trays sit atop drains to catch food and prevent it from washing into the drain system. The drain tray is made of heavy-duty white plastic, and its dimensions are 8.5" x 8.5" x 2".

### BENEFITS

- Can reduce costly drain stoppages between scheduled maintenance services
- Alleviates the inconvenience of flooded sinks in a busy kitchen workplace
- Prevents large items, such as gloves, plastic bags and large food debris from entering the plumbing system

Mesh Drain Sock

Inserts easily into drain.

Drain Sock is 8" long

Drain Tray
