

Baker Commodities, Inc.
Recycling for Life®

FEATURES

Drain Locks fit into drain sizes 1.5", 2", 3" and 4" and cannot be removed without a wrench. All Baker Commodities drain filter and lock products can be used together to stop food debris from clogging the drains in your kitchen.

BENEFITS

- Easily installed and locked within seconds into a sink, preventing employees or cleaning staff from removing
- Prevents clogs
- Changes staff behavior
- Increases productivity. Staff can focus on their jobs rather than managing drain backup emergencies

DRAIN LOCKS

Drain Socks and Trays keep food from discharging into the drain system, but they will not prevent restaurant employees from removing them and washing food debris into the drain. Baker's new Drain Lock system prevents this from happening.

Drain Lock

Inserted drain lock.
